Profile and Objective:

I am an educated, polite, well-organized and self-sufficient man. I have good nautical ability as a seaman and good vision and listening abilities. I went on boat with my father since I was a child. Since I was 16 I had a boat of six meters with which I always went to the beach with my brother and friends. Obtained a nautical licence I steered the family wood motor-boat of ten meters for a few years, with which I sailed along the coast of Croatia from *Umag* to *Split* (all *Kornati* islands).

From my father I learned a lot: he was owner and manager of a hotel and passing much time I learned how to prepare large tables, dishes of sliced and side dishes. As much as possible I could also help in the kitchen.

In the “*Italian Ship Academy*” of Genova, I played the role of “*Service Cadet*” that is a class coordinator who controlled the discipline and the cleaning of the uniforms of colleagues. In these months I had to develop my level of autonomy and learn how to get organized to make the most of my routine.

I had an experience of a week aboard the schooner “*Pandora*” of La Spezia, where we were taught the Seafaring arts and they showed us the life on board.

My ambition is to become a great Navigational Officer following 12 months of navigation as deck Cadet on board of a Super-yacht, establishing the basics required for an excellent career as Captain.
